CHEMICAL LAB PACKING

WHAT IS CHEMICAL LAB PACKING?

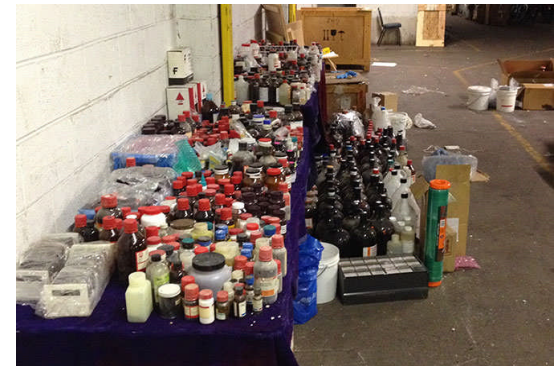

Chemical Lab Packing is the process by which containers of unwanted, expired, or no longer usable liquid, solid, or compressed gas laboratory chemicals are safely identified, segregated by chemical hazards, and packaged with other compatible chemicals in an outer container (ie, drum or pail) pursuant to DOT, RCRA, NRC, and all other applicable Federal and State regulations, in preparation for off-site transport and disposal.

WHY SHOULD LAB PACKING BE COMPLETED BY TRAINED PROFESSIONALS?

Chemical Lab Packing must follow specific rules, regulations, and exceptions as outlined by DOT, RCRA, NRC, etc. Improper packaging or handling could lead to dangerous chemical reactions, health hazards, or substantial fines from regulatory agencies.

WHO NEEDS CHEMICAL LAB PACKING SERVICES?

- Federal, State and Local Governmental Agencies
- Colleges, Universities and K-12 Schools
- Research and Development Facilities
- Hospitals, Health Care and Dental Offices
- Analytical Laboratories
- Manufacturing Facilities
- Construction and Demolition Contractors
- Environmental and Engineering Consultants
- Photographic and Printing Companies
- Public Utilities (Gas, Electric, Water)
- Mining Facilities
- Transportation and Logistics Companies
- Retail Establishments and Markets
- Waste Management and Recycling Facilities
- Property Management and Storage Companies

In Compliance With ISNetworld's
Stringent Vendor Requirements

Your single source for innovative, comprehensive
industrial, environmental, and waste management solutions.

24 Hour Emergency Response: 734.437.9677

**INNOVATIVE
WASTE MANAGEMENT
AND REMEDIATION
SERVICES**

SERVICES OVERVIEW

WHY USE ERG ENVIRONMENTAL SERVICES FOR YOUR CHEMICAL PACKING NEEDS?

- ERG offers a unique blend of highly knowledgeable, experienced, and trained personnel that work as a team to deliver professional, efficient services in compliance with all regulatory requirements.
- **You can leave all of the work to us!** We can prepare an on-site waste inventory (or you can provide one to us) in advance of our arrival, to ensure we arrive with plans for waste segregation, stabilization, packaging and labeling. This allows us time to work with you to obtain SDS's for products or obtain them through other avenues, as needed. This ensures we mobilize proper waste containers and materials needed to complete the work and to make certain that off-site waste transport and disposal are performed professionally and in compliance with all applicable regulations.
- ERG offers an extensive network of final waste treatment and disposal facilities to meet your needs, in full compliance with waste transport and disposal regulations, including **recycling, fuel blending, stabilization, neutralization, waste-to-energy (WTE), incineration or landfill disposal.**
- **In addition to Chemical Lab Packing, ERG also provides:**
 - *Hazardous and Non-Hazardous Waste Services*
 - *Universal Waste Recycling*
 - *PCB Waste and Remediation Services*
 - *Other Specialized Environmental and Waste Services*
 - *Environmental Site Investigation and Remediation*
 - *Waste and Environmental Sampling and Analysis*
 - *Industrial Management Services*
 - *Health and Safety Training*
 - *Household Hazardous Waste Events*
 - *Sandblasting Equipment Sales*
 - *Solvent Recovery, Parts Washing Equipment and Sorbent Products Sales and Distribution*

CHEMICAL LAB PACKING SERVICE EXAMPLES

- *Explosive Chemical Evaluation and Deactivation*
- *Laboratory Chemical Segregation and Packaging*
- *Unknown Chemical Identification and Removal*
- *Known/Unknown Compressed Gas Cylinder Identification and Disposal*

EXAMPLES OF LAB PACK CHEMICALS

- *Aerosols*
- *Corrosives – Acids and Bases*
- *Cyanides*
- *Dangerous When Wet (Water Reactive) and Water-Reactive Acids*
- *Flammable Liquids and Acidic or Basic Flammable Liquids*
- *Herbicides, Fungicides, Pesticides, and Rodenticides*
- *Mercury and Mercury Devices*
- *Non-Hazardous and Neutrals*
- *Oxidizers and Oxidizing Acids*
- *PCB's*
- *Peroxides*
- *Poisons and Toxics*
- *Pyrophorics (Explosives)*
- *Radioactive Materials*
- *Self-Reactive Chemicals*
- *Spontaneously Combustible*
- *Sulfides*
